FULL HEIGHT SHOWER ENCLOSURES

TRANSFORM YOUR BATHROOM SPACE

Elevate your bathroom experience with our sophisticated Full Height Shower Enclosures. Designed to bring a touch of elegance and modernity to any bathroom space, these enclosures provide a seamless and luxurious aesthetic. They transform your bathroom by enhancing the visual appeal while offering practical benefits that ensure a superior bathing experience.

FULL HEIGHT SHOWER ENCLOSURES

APPLICATIONS AND SPECIFICATIONS

Ideal for hotels, luxury residential multi-units, spas, clubs, and shower & locker room settings, these shower enclosures include walk-in configurations, partition modules, and hinged door setups. The flexible design allows for various configurations, ensuring a perfect fit for your specific space requirements. Bi-facade modules feature the interior shower side in painted glass and the exterior customizable in lacquered wood or glossy/satin painted glass in any of our sample book colors. The aluminum structure can be painted in 56 matte colors or 6 metal-effect options, providing seamless integration with your existing decor and enhancing the customization potential for a truly

FULL HEIGHT SHOWER ENCLOSURES

FEATURES AND BENEFITS

Our Full Height Shower Enclosures are crafted with precision and attention to detail. Featuring robust painted aluminum frames paired with tempered glass available in extra-clear, smoked, and bronze varieties, these enclosures come in transparent or satin finishes. Heights range from 2.2 to 3 meters (-87" to -118") for walk-in models and up to 2.8 meters (-110") for configurations with doors. The innovative design ensures both durability and ease of maintenance. For added customization, the aluminum frame and the inner glass edge are available in multiple colors, including Black, White, or Steel, with additional color options available, upon request.

FULL HEIGHT SHOWER ENCLOSURES

FULL HEIGHT SHOWER ENCLOSURES

FULL HEIGHT SHOWER ENCLOSURES - TREND 5.0

Trend 5.0 Shower System

The Trend 5.0 Shower System is the epitome of modern elegance, offering hybrid double-sided modules that combine functionality with a luxurious aesthetic. The inward-facing part of the shower is available in painted glass, while the outer side can be finished in wood with lacquered or veneered finishes, or in painted glossy or satin glass. This system is ideal for those looking to create a visually striking bathroom centerpiece.

Door:

The Trend 5.0 includes a pivoting door system, which can be opened inward or outward. The passage space is slightly reduced compared to the door size, ensuring a sleek design without compromising on accessibility.

WET and DRY versions: The WET door is specifically designed for shower enclosures, while the DRY door is intended for sanitary spaces or other specific uses.

Fixed Modules:

The fixed module in the Trend 5.0 system is crafted to close spaces between walls, with a maximum height of 3 meters (~118"). This module can be tailored to match the aesthetic and waterproofing qualities of the main modules.

Partition Modules:

These modules provide a practical solution for separating different areas within the shower space, such as between the shower and sanitary zones. They are available in finishes that match the main modules, ensuring a cohesive design.

Fixing Bars:

For configurations not anchored to the ceiling, the Trend 5.0 system includes fixing bars. Depending on the layout, these bars can be straight or orthogonal to the shower wall, offering flexibility.

FULL HEIGHT SHOWER ENCLOSURES - TREND MASTER

Trend Master Shower System

The Trend Master Shower System combines elegance and versatility, suitable for various bathroom layouts. It offers walk-in configurations, partition modules, and hinged doors, providing a refined look and functional options. Ideal for those seeking a sophisticated, high-quality solution that adapts to diverse needs while maintaining a cohesive and modern aesthetic.

Door:

The Trend Master features a pivoting door system that can be opened both inward and outward. The space for passage is only slightly narrower than the door width, providing a sleek and elegant appearance while ensuring ease of access.

Hybrid Module Options: The Trend Master includes configurations with high-quality finishes and materials, such as glass or metal accents, allowing for a refined look that can be integrated seamlessly into various bathroom designs.

Fixed Modules: Fixed modules in the Trend Master system are crafted to close off spaces between walls. These modules are available up to a maximum height of 118.1 inches (3 meters (-118")) for walk-in versions, and are designed to maintain the aesthetic consistency and waterproofing qualities of the main modules.

Partition Modules: Partition modules provide an effective solution for separating different functional areas within the shower space. These modules match the primary finishes of the system, ensuring a unified and sophisticated design throughout the bathroom.

Fixing Bars: For configurations not supported by ceiling mounts, the Trend Master system includes fixing bars. These bars can be configured to be straight or orthogonal to the shower wall, depending on the specific layout requirements, providing structural stability and flexibility in installation.

FULL HEIGHT SHOWER ENCLOSURES - TREND LINE

Trend Line Shower System

The Trend Line Shower System is designed for simplicity and functionality. It features essential configurations like walk-in and hinged doors, perfect for modern bathrooms. Its clean design and efficient options make it a practical choice for achieving a sleek, contemporary look in any space.

Door: The Trend Line system incorporates a pivoting door mechanism that opens both inward and outward. The passage space is only slightly reduced compared to the door width, offering a streamlined and modern design without compromising accessibility.

Simplified Configuration Options: Trend Line focuses on providing essential, user-friendly configurations for straightforward installation and use. It includes streamlined materials and finishes that blend well with various bathroom styles.

Fixed Modules: Fixed modules in the Trend Line system are designed to close off spaces between walls. These modules are available with a maximum height of up to 3 meters (~118") for walk-in versions and maintain the simplicity and functionality that defines the Trend Line system.

Partition Modules: Partition modules in the Trend Line system are ideal for creating distinct sections within the bathroom, such as separating the shower from dry areas. They come in finishes that are consistent with the main modules, promoting a cohesive and clean look.

Fixing Bars: The Trend Line system also includes fixing bars for configurations not anchored to the ceiling. These bars, whether straight or perpendicular to the shower wall, provide necessary support and stability, allowing for flexible installation options.

FULL HEIGHT SHOWER ENCLOSURES - TECHNICAL DETAILS

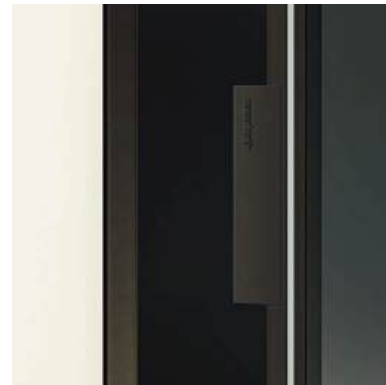

DRY door

Handle on the outer side

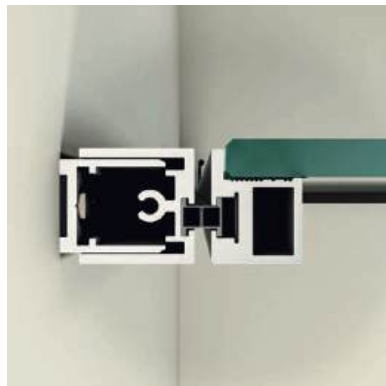

Handle on the inner

Full Height Shower System: GLASS

CARVART CASABATH's shower systems offer versatile partition modules, ideal for separating two contiguous spaces, such as shower and sanitary areas. Fixed modules are available in both Trend Master and Trend Line aesthetics, ensuring watertight integrity and seamless integration with other shower systems. The doors feature a pivoting opening mechanism, swinging inward or outward, with a passage space reduced by only -2 1/2" compared to the door size. "WET" doors are designed for shower areas, while "DRY" doors are suited for sanitary enclosures. Maximum door height is 2.8 meters (-110"), with taller configurations requiring a feasibility check. Depending on the setup, the fixing bar can be straight or orthogonal, with no price difference between ceiling-anchored or bar-fixed versions of the same height.

Full Height Shower System: GLASS

CARVART CASABATH offers 12 types of toughened glass, all -5/16" thick, providing a wide range of aesthetic and functional options for shower enclosures. The V3 glass features a sandblasted rifled texture, while the V4 version has an embossed rifled texture; however, V4 glass is not available for the TREND LINE version.

The inside of the shower enclosures always comes with a painted edge, available in three standard colors: Black, White, or Steel, matching the aluminum frame. It is possible to request the painted edge in a custom color or by providing a color sample, allowing for further personalization to suit any design needs.

FULL HEIGHT SHOWER ENCLOSURES - FINISHES / COLOR

Vibrant and Versatile Color Options

The aluminum frame offers a wide range of painted finishes for its aluminum frames and structures, allowing for maximum customization. With 56 matte colors to choose from, this finish option provides a vibrant and versatile solution to match any bathroom design. Whether you are looking for a bold statement or a subtle, minimalist tone, these painted finishes ensure your bathroom is tailored to your unique aesthetic preferences.

Sophisticated Metal and Organic Wood Finishes

The strength of metal and the warmth of natural wood can be combined in an extensive selection of metal-effect and wood finishes. The 6 metal-effect finishes bring an industrial yet refined touch, while the 19 wood finishes add a natural, timeless elegance to any space. The metal options offer durability with a sleek, modern appearance, while the wood finishes range from light and airy to rich and deep tones, perfect for creating a warm and inviting environment. Whether you prefer the cool edge of steel or the organic beauty of oak, CARVART CASABATH provides endless possibilities for customization.

ELECTRIC MIRRORS & CABINETS

ELECTRIC MIRRORS & CABINETS

MODERN ELEGANCE AND FUNCTIONALITY

Elevate your bathroom experience with CARVART CASABATH's Electric Mirrors and Medicine Cabinets. These products seamlessly blend advanced technology with sleek design, adding a modern and practical touch to any bathroom setting. Whether you're seeking an elegant mirror with integrated lighting or a medicine cabinet with smart storage features, these solutions are designed to enhance both the aesthetic and functionality of your space.

ELECTRIC MIRRORS & CABINETS

APPLICATIONS AND SPECIFICATIONS

Ideal for various settings such as hotels, luxury residential multi-units, spas, clubs, and shower & locker rooms, these products offer flexible and innovative solutions. The Reflex mirror cabinets feature double-sided mirror doors with integrated lighting on both the exterior and interior, perfect for well-lit, spacious environments. The Wave model includes an automatic timed shut-off system, enhancing energy efficiency. Meanwhile, the Sesame model provides options for motorized or manual opening, with a front-opening vasistas mirror container for added convenience. Each product is designed to integrate seamlessly into modern spaces while offering superior functionality.

ELECTRIC MIRRORS & CABINETS

FEATURES AND BENEFITS

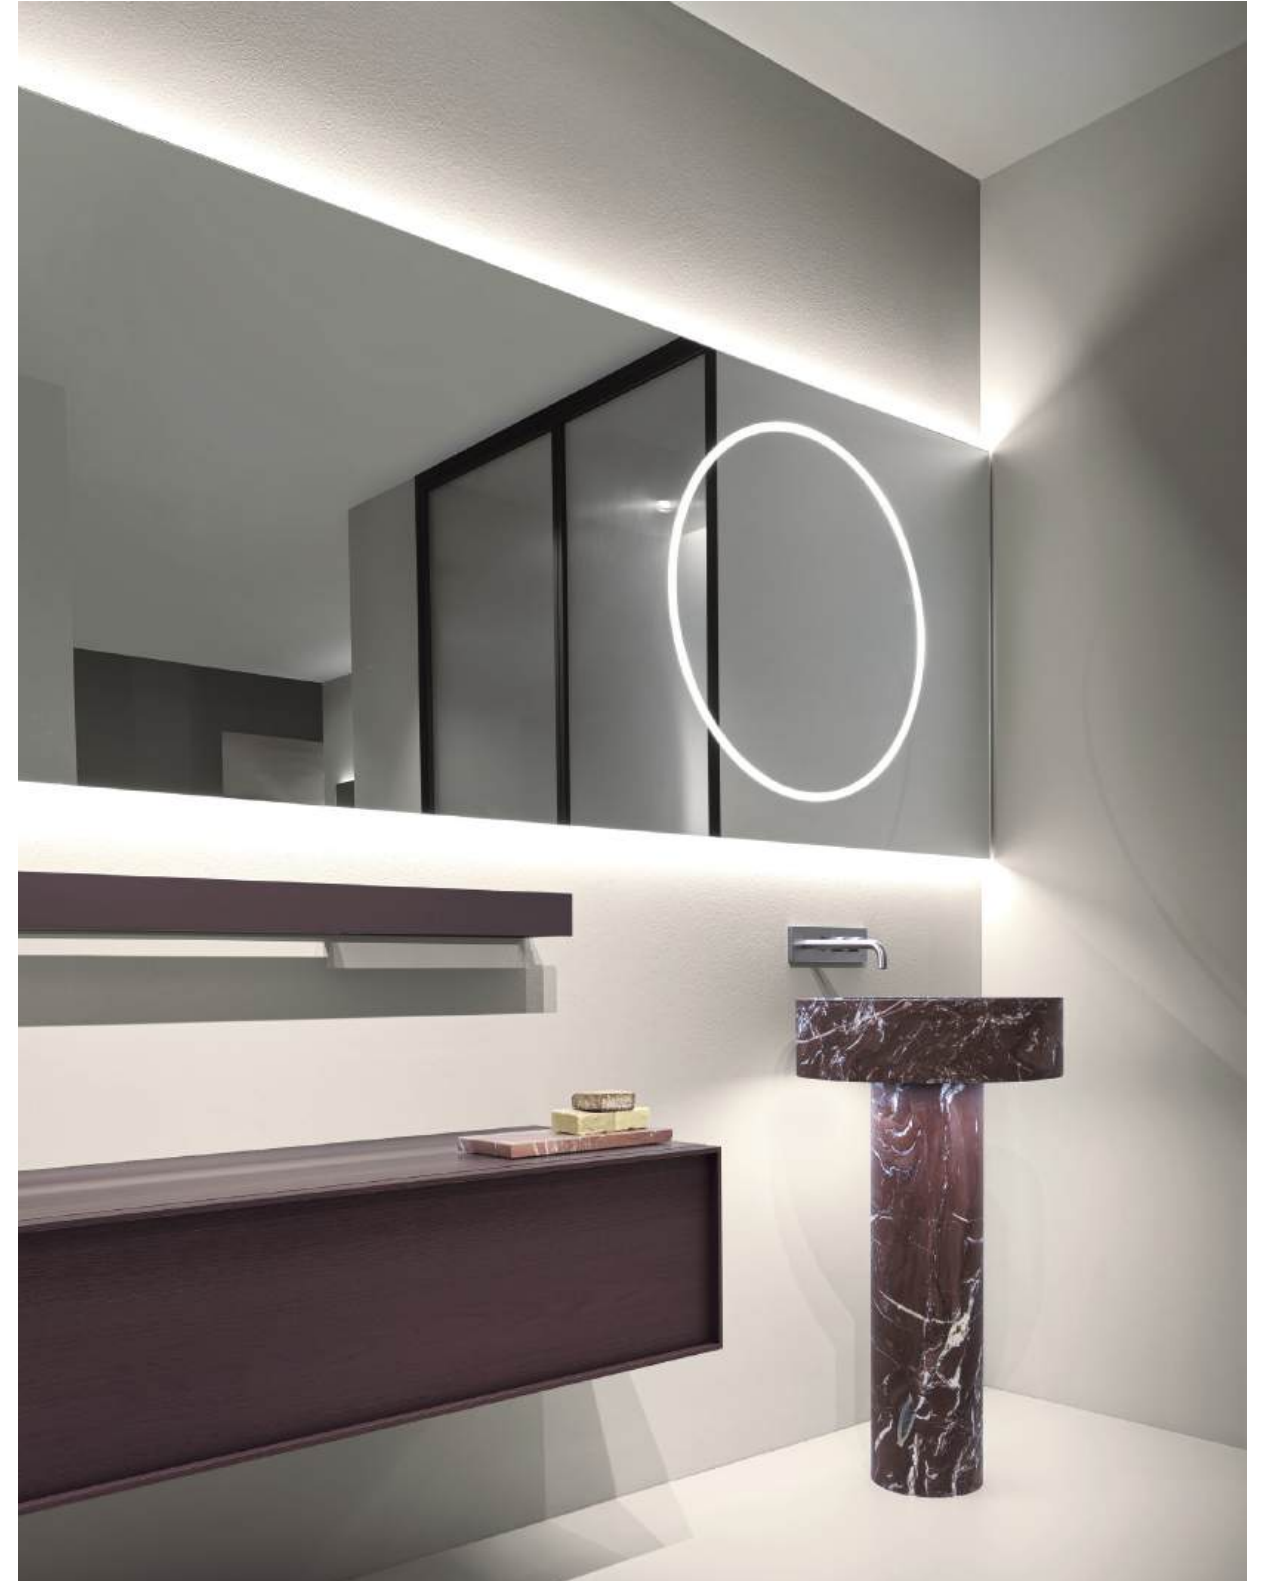

CARVART CASABATH's electric mirrors and medicine cabinets are equipped with cutting-edge features such as integrated lighting systems, which improve both functionality and visual appeal. These mirrors offer built-in lighting along the upper and lower edges, providing optimal illumination for daily grooming routines. Available in recessed or wall-mounted configurations, they feature sleek aluminum frames that can be customized in a wide range of colors from the CARVART palette.

ELECTRIC MIRRORS & CABINETS

ELECTRIC MIRRORS & CABINETS

ELECTRIC MIRRORS & CABINETS - STK NORDIK 2

STK Nordik 2

The STK Nordic 2 Mirror System combines simplicity, functionality, and refined elegance, drawing inspiration from the natural beauty and minimalism of Nordic design. Crafted with precision, this collection integrates seamlessly into a variety of bathroom or living space designs, providing both utility and aesthetic appeal.

Design: The STK Nordic 2 mirror features an aluminum frame that is beautifully covered in Ash veneer, available in various natural shades such as Sand and Smoke. This design element adds a warm, organic touch to the mirror's sleek structure. A built-in shelf adds practical storage space, while the integrated LED lighting along the bottom edge provides soft, functional illumination, enhancing the overall usability and appearance of the mirror.

Materials: The combination of aluminum and Ash veneer creates a durable yet visually pleasing design that reflects the essence of modern Scandinavian style.

Finish Options: The Ash veneer is available in a selection of finishes that complement a range of interior styles.

Integrated LED Lighting: Lighting is incorporated along the bottom edge of the mirror, offering practical lighting for daily tasks while adding a modern, stylish touch to the design.

Built-in Shelf: The mirror includes a shelf integrated into the frame, providing extra storage space for bathroom essentials, which adds both convenience and a functional aesthetic element to the design.

ELECTRIC MIRRORS & CABINETS - STK NORDIK 2

Technical Information

The STK Nordic 2 Mirror System: is meticulously crafted to provide a modern, versatile mirror solution for various bathroom spaces. Its aluminum frame, combined with Ash wood finishes, makes it both stylish and durable. Integrated LED lighting and the inclusion of a built-in shelf further enhance its functionality, making it a perfect blend of form and function.

Structure: Aluminum frame covered in Ash wood, available in natural finishes such as Sand and Smoke. Built-in shelf within the mirror frame for additional storage.

Lighting: Integrated LED lighting along the bottom edge provides practical illumination and enhances the mirror's modern appearance.

Measurements:
Height 140 cm (~55")
Width 90cm (~35")
Depth 15 cm (~6")

Customization: Other dimensions are customizable, ensuring a perfect fit for different spaces.

ELECTRIC MIRRORS & CABINETS - REFLEX

Technical Information

The Reflex Mirror System: is highly adaptable, offering a range of configurations and customizable features to suit various bathroom designs. With double-sided mirror doors and integrated LED lighting, it offers both practical utility and elegant aesthetics. Whether installed semi-recessed or fully recessed, the Reflex system blends seamlessly into any modern bathroom layout.

Structure: Double-sided mirror doors with an aluminum frame and matt lacquered wood. Available in various color options to match your design preferences. Internal wooden shelves add practical storage while maintaining a clean appearance.

Lighting: LED lighting is integrated into the upper edge of the frame, with additional lighting in the lower open compartments for enhanced illumination.

Customization: Available in 1 to 4 door configurations, offering flexibility in design. Available in semi-recessed and fully recessed versions, including Reflex 2 and Reflex 3 models.

Optional Features: Mirror-coated outer sides for a sleek, reflective finish that enhances the overall look.

Measurements:

Height: From 76 cm (~30") to 120 cm (~47")

Width: Ranges from 40 cm (~16") to 60 cm (~23")

Depth: 15 cm (~6") for standard configurations

ELECTRIC MIRRORS & CABINETS - INVISIBLE

INVISIBLE Mirror System

The Invisible Mirror System offers a discreet, versatile solution for contemporary interiors. This collection features recessed cabinets that are designed to seamlessly blend into any space, making it ideal for minimalist and modern designs.

Design: The Invisible system includes a range of recessed cabinets available with either mirrored or wooden doors. The wooden doors can be painted in various colors from the sample palette, or even matched to the wall color upon request, ensuring a seamless integration into any room.

Dimensions: Recessed Installation: All cabinets in the Invisible collection have a uniform depth of 13 cm (~5"), making them perfectly flush with the wall.

Special Features: Customizable doors, choose between mirrored doors for added reflectivity or wooden doors that can be customized with paint to blend with the surrounding decor.

LED Groove or Push Opening: The doors can be equipped with either a subtle LED groove for easy opening or a push mechanism for a sleek, handle-free appearance.

ELECTRIC MIRRORS & CABINETS - MIRROR SYSTEM

MIRROR SYSTEM

The Mirror System is a versatile collection of mirror cabinets designed to offer both functionality and elegance. With options for both recessed and surface mounted installations, this system can be adapted to suit a variety of bathroom layouts.

Design: The mirror cabinets in this collection feature an inner wooden structure paired with an external structure made of painted aluminum. The design includes double-sided mirror doors, which enhance both the practical use and the visual appeal of the system.

Dimensions: Recessed version, the fully recessed version has a depth of 13cm (-5"), allowing the cabinet to sit flush with the wall.

Surface Mounted Version: The Surface Mounted version has a depth of 15 cm (-6") providing additional projection and storage space.

Special Features: Double-Sided Mirror Doors: The doors are mirrored on both sides, offering enhanced functionality and aesthetic appeal.

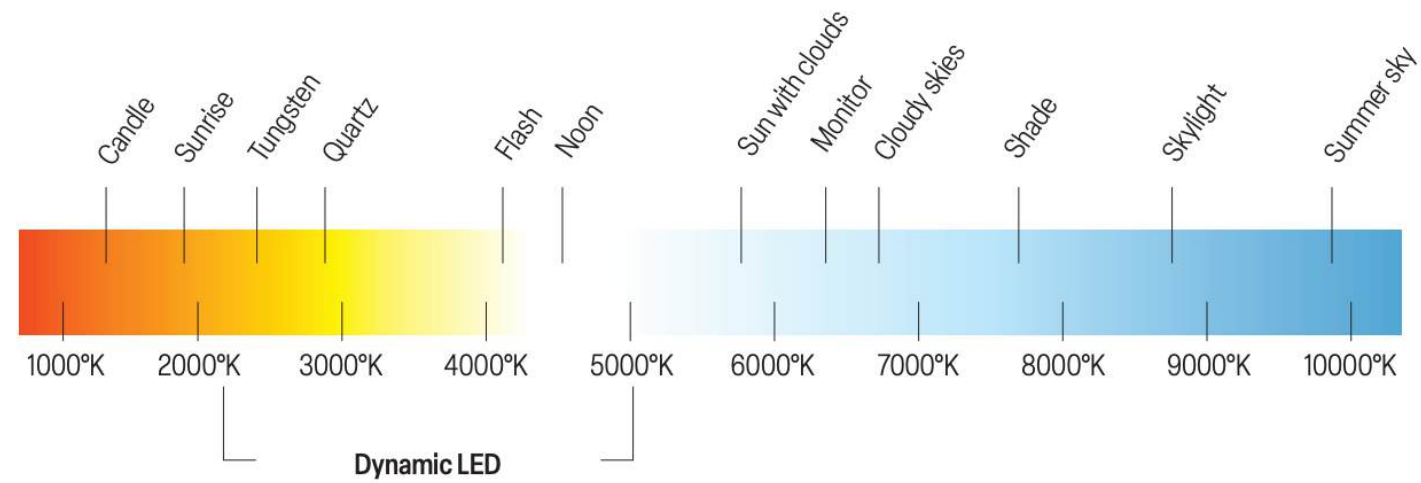

Integrated Lighting: The upper edge of both the external and internal structures features integrated lighting. In the recessed wall version, additional lighting is present in the lower open space, providing increased illumination and ambiance.

ELECTRIC MIRRORS & CABINETS - LIGHTING/AMBIANCE

Dynamic LED Lighting for Perfect Ambiance

Our Electric Mirrors and Medicine Cabinets feature advanced LED technology, offering dynamic color temperature control from warm light (2200K) to cool light (5000K). This allows users to customize the lighting to suit their mood and needs, from a relaxing ambiance to a bright, invigorating setting. With a high CRI value of 80 to 90, the lighting is perfect for makeup application and personal care, providing a true-to-life reflection. An integrated touch dimmer switch enhances the user experience, allowing for precise control over the lighting environment.

CRI 50 - 70

CRI 50 - 80

CRI 85 - 90

In/Out Wireless Lighting System for Seamless

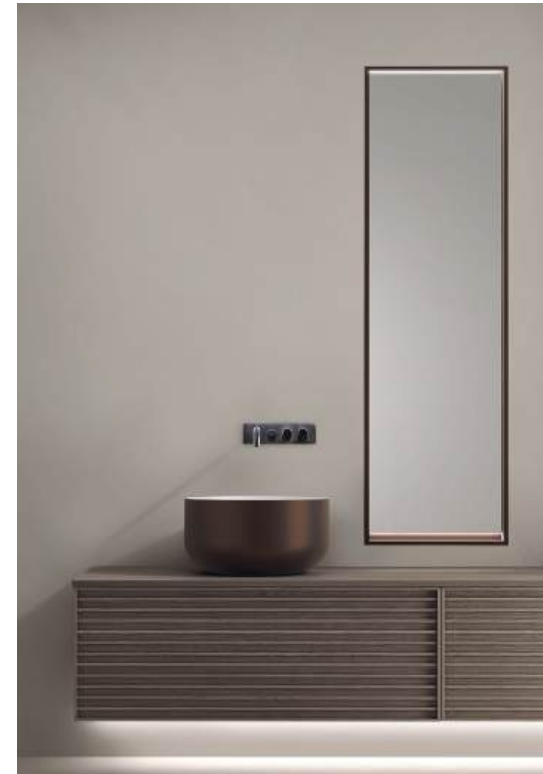

The revolutionary In/Out wireless lighting system is designed to enhance the usability of mirrored cabinets. It provides selective illumination by activating the exterior LED light when the door is closed and switching to interior lighting upon opening. This intuitive system, controlled by a simple switch, ensures effortless transitions and includes an automatic shutdown after 20 minutes to promote energy efficiency. The In/Out system is ideal for creating a well-lit, user-friendly environment in any bathroom setting.

VANITIES

VANITIES

ELEGANT AND FUNCTIONAL BATHROOM SOLUTIONS

Enhance your bathroom with CARVART CASABATH's exquisite vanities. Designed to blend sophistication and practicality, these vanities cater to a variety of design preferences and elevate any bathroom space.

VANITIES

APPLICATIONS AND SPECIFICATIONS

These vanities are ideal for multi-unit residential homes and luxury hotel environments. The STK Nordic collection, for instance, offers single-piece units with 45-degree edge finishes and multi-piece solutions with traditional 90-degree edges. Available in smooth and staved styles, these vanities come with either flush pulls or aluminum handles painted to match the door finishes. The flexible design ensures ample storage and a refined, sophisticated look, making them suitable for a wide range of applications.

VANITIES

FEATURES AND BENEFITS

CARVART CASABTH's vanities are renowned for their quality and innovative design. The Hi-Tech collection features tops and sides with a thickness of 14 mm (-0.55"), available in styles such as lacquered aluminum frames, aluminum handle edges, and wooden front sides. The Zero15 collection expands on this versatility, offering finishes in wood, painted glass, mirrors, and marble fronts, with options for handle or push-pull openings. Each vanity is customizable with various finishes, ensuring a perfect match for any decor.

VANITIES

VANITIES

VANITIES - STK NORDIK

STK Nordic Vanity Collection

The STK Nordic Vanity Collection celebrates the natural beauty of wood, focusing on craftsmanship that balances simplicity with sophistication. This collection brings a sense of timeless elegance to any space, making it a perfect fit for those who appreciate high-quality materials and refined design.

Design: The STK Nordic collection is exclusively available in Ash veneer, offered in four distinctive shades: Smoke, Sand, Natural, and Moka. The design emphasizes clean lines and minimalist forms, providing a rigorous aesthetic that elevates the environment while remaining understated and elegant.

Dimensions: The collection is versatile, accommodating a variety of bathroom sizes and layouts. Specific dimensions can be customized to fit the space requirements, maintaining the balance between form and function.

Exclusivity in Ash Veneer: The collection is offered solely in Ash veneer, ensuring a unique and consistent look across all pieces.

Four Distinct Shades: The available shades—Smoke, Sand, Natural, and Moka—allow for personalization to suit different interior styles.

Timeless Design: The simple yet sophisticated forms ensure that the vanity remains a timeless addition to any bathroom.

VANITIES - XL-XS

XL-XS Vanity Collection

The XL-XS Vanity Collection offers a versatile approach to bathroom design, drawing inspiration from the XL collection with a refined, subtler texture. This collection includes all necessary modules for washbasin cabinets and storage, making it a comprehensive solution for any bathroom space.

Design: The XL-XS collection is available in two main variations: the smooth finish and the horizontal groove finish, which is used to open drawers. The collection is available in Walnut and Oak versions, with the Walnut option featuring three-layer panels for enhanced structural stability.

Dimensions: The vanities come in a variety of widths, depths, and heights, making them suitable for various bathroom configurations. Specific dimensions include widths ranging from 60 cm to 200 cm (-24" to -79"), providing ample options for customization.

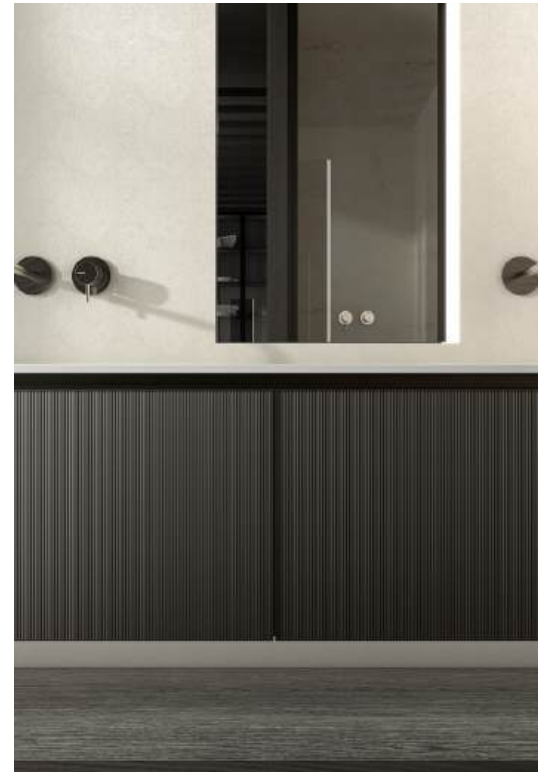

Horizontal Groove for Drawers: The collection offers a unique design element where drawers are opened via a horizontal groove, adding to the minimalist aesthetic.

Monoblock Solutions: The monoblock version features a 45-degree cut and is available in solid Oak. This version is modular, allowing for easy integration with traditional structures.

Material Options: Available in both Walnut and Oak, with the Walnut version designed for long-term stability due to its three-layer construction.

VANITIES - ZERO 15

ZERO 15 Vanity Collection

The ZERO 15 Vanity Collection offers a streamlined, contemporary design that is both functional and aesthetically pleasing. This collection is perfect for modern bathrooms where simplicity and clean lines are paramount.

Design: The ZERO 15 collection features a minimalist approach with smooth, handleless fronts and a sleek, integrated design. The vanities are available in various finishes, allowing for a customized look that can seamlessly blend with the bathroom's overall design.

Dimensions: The ZERO 15 collection offers a range of sizes, making it suitable for both compact and spacious bathrooms. Depth options allow for flexibility in installation, accommodating different room layouts and plumbing configurations.

Minimalist Design: The absence of handles and the clean lines create a seamless appearance.

Customization Options: A variety of finishes and sizes are available to match the specific needs and aesthetic preferences of any bathroom.

Integrated Design: The design ensures that all elements of the vanity work together harmoniously, from the cabinetry to the washbasin.

FULL-HEIGHT STORAGE COLUMNS

FULL-HEIGHT STORAGE COLUMNS

STYLISH FUNCTIONAL VERTICAL STORAGE SOLUTIONS

CARVART CASABATH's full-height storage columns are designed to offer a perfect combination of elegance and practicality. These tall storage units enhance the vertical space in any bathroom or living area, providing a sleek and modern storage solution. Their versatility allows them to integrate seamlessly into various design schemes while offering substantial storage capacity.

FULL-HEIGHT STORAGE COLUMNS

APPLICATIONS AND SPECIFICATIONS

Ideal for use in residential, hotel, or commercial environments, these full-height storage columns are perfect for organizing bathroom essentials, toiletries, or decorative items. The modular design allows for flexible configurations, with options for open shelves, drawers, or enclosed cabinets. Whether used as standalone pieces or integrated into a larger storage system, CARVART CASABATH's full-height storage columns provide a sophisticated, space-saving solution tailored to meet the needs of any interior. The combination of durable materials and customizable finishes makes them a timeless addition to any space.

FULL-HEIGHT STORAGE COLUMNS

FEATURES AND BENEFITS

These full-height columns are available in a range of finishes, including Ash veneer, which adds a natural, textured element to the design. The solid Ash frame ensures durability, while the outside surfaces are finished in a luxurious open-pore matte lacquer, allowing the grain of the wood to be showcased. For those preferring a more contemporary look, the columns can also be customized in painted or metal finishes, complementing any modern interior design. The inside structure of the columns is finished in matching matte lacquer, ensuring consistency throughout. Optional LED lighting can be integrated into the open niches, further enhancing the visual appeal while adding practical illumination.

BATH TUBS

BATH TUBS

LUXURIOUS AND FUNCTIONAL BATHING SOLUTIONS

CARVART CASABATH's bathtubs combine elegance, comfort, and innovative materials to deliver exceptional bathing experiences. Crafted with precision and designed to fit a variety of spaces, these bathtubs enhance both the aesthetic and functionality of any bathroom. Whether designed for a residential home, luxury hotel, or spa setting, CARVART CASABATH offers versatile options that seamlessly integrate into various design schemes.

Both the MySpace and SPA bathtubs are crafted from Monolith, a durable and non-porous solid-surface material that ensures long-lasting quality. This exclusive material, known for its even texture and smooth, hand-finished surfaces, provides a sleek, modern look while being resistant to wear and easy to maintain.

MySpace Bathtub:

Available heights: 50 cm (~20") and 55 cm (~22")

Designed with an automatic overflow system to maintain water levels at 37 cm (~15"), ensuring a safe and controlled bathing experience. Customizable with a matte Monolith finish or an exterior painted in any color from the CARVART CASABATH color palette.

SPA Model Bathtub:

Offers a deeper soaking experience with a water level maintained at 42 cm (~17").

Built entirely from Monolith, it includes a chrome-plated drain and automatic overflow system, providing a stress-free bathing experience. Both models feature customizable options for finish and size, and include a chrome-plated siphon and drain for optimal functionality, offering flexibility and luxury for any bathroom space.

BATH TUBS

APPLICATIONS AND SPECIFICATIONS

Perfect for residential bathrooms, luxury hotels, and spas, CARVART CASA BATH's bathtubs are designed to suit diverse environments. The bathtubs come in various sizes and heights, providing flexibility for different installation requirements. Whether you're looking for a sleek minimalist design or a more luxurious, spa-like experience, these bathtubs offer the perfect balance of form and function. The ability to customize finishes, combined with the durable and easy-to-maintain nature of Monolith, ensures that CARVART CASA BATH's bathtubs will be a timeless addition to any bathroom setting.

BATH TUBS

FEATURES AND BENEFITS

CARVART CASA BATH's bathtubs are available in Monolith, a superior solid-surface material known for its even texture, color uniformity, and durability. Monolith's non-porous nature makes it resistant to wear, while its hand-polished finish provides a sleek, refined look. Each bathtub is available in matte finishes or can be customized with painted exteriors from the CARVART CASA BATH color palette, offering a tailored solution for any bathroom.

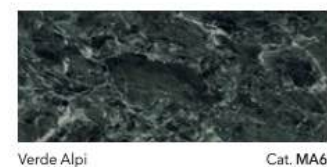

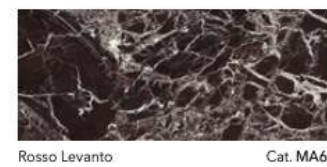

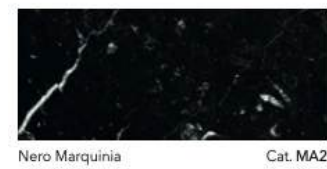

The bathtubs feature an automatic overflow system that ensures optimal water levels, preventing overflows and maintaining a safe and enjoyable bathing experience. Chrome-plated drains and siphons are included with each model, and for those requiring deeper bathtubs, varying height options are available. The hand-finished nature of each bathtub guarantees the highest level of craftsmanship, with slight variations in dimensions reflecting their bespoke quality.
