CARVART®

residentialBATH

>Shower Enclosures

CARVART's shower enclosures elevate the bath experience with precision-engineered stainless steel framing available in a broad spectrum of premium PVD finishes, ensuring both durability and a refined aesthetic.

Our enclosures offer thoughtful flexibility with operable transoms and an extensive suite of coordinating hardware—from towel bars and pulls to toilet paper holders and soap trays—so the entire bathroom feels curated and cohesive.

Whether your design calls for sliding doors, pivot doors, or butt hinges, CARVART provides tailored solutions that harmonize functionality with design intent, making every bathroom a seamless blend of performance and elevated detail.

Our Collection

CARVART provides tailored shower enclosure solutions designed to meet the aesthetic, functional, and spatial requirements of each project. From fully bespoke systems to turnkey configurations, enclosures can be specified as full-height or partial-height assemblies with fixed or operable transoms, sidelights, and custom glazing layouts for a wide range of architectural conditions.

Why Use a PVD Finish?

PVD finishes bring exceptional durability and long-term beauty to shower enclosures. Applied to stainless steel, PVD creates a highly resistant surface that withstands moisture, corrosion, fingerprints, and daily cleaning without fading or tarnishing. The result is a rich, consistent finish—whether brushed bronze, champagne, or matte black—that maintains its depth and luster in demanding wet environments while offering superior performance over traditional plated coatings.

- Extremely hard surface – PVD coatings are much harder than traditional electroplating or painted finishes, making them highly scratch- and wear-resistant.
- Corrosion resistance – Enhances the natural corrosion resistance of stainless steel, especially useful in bathrooms, spas, coastal projects, and hospitality environments.

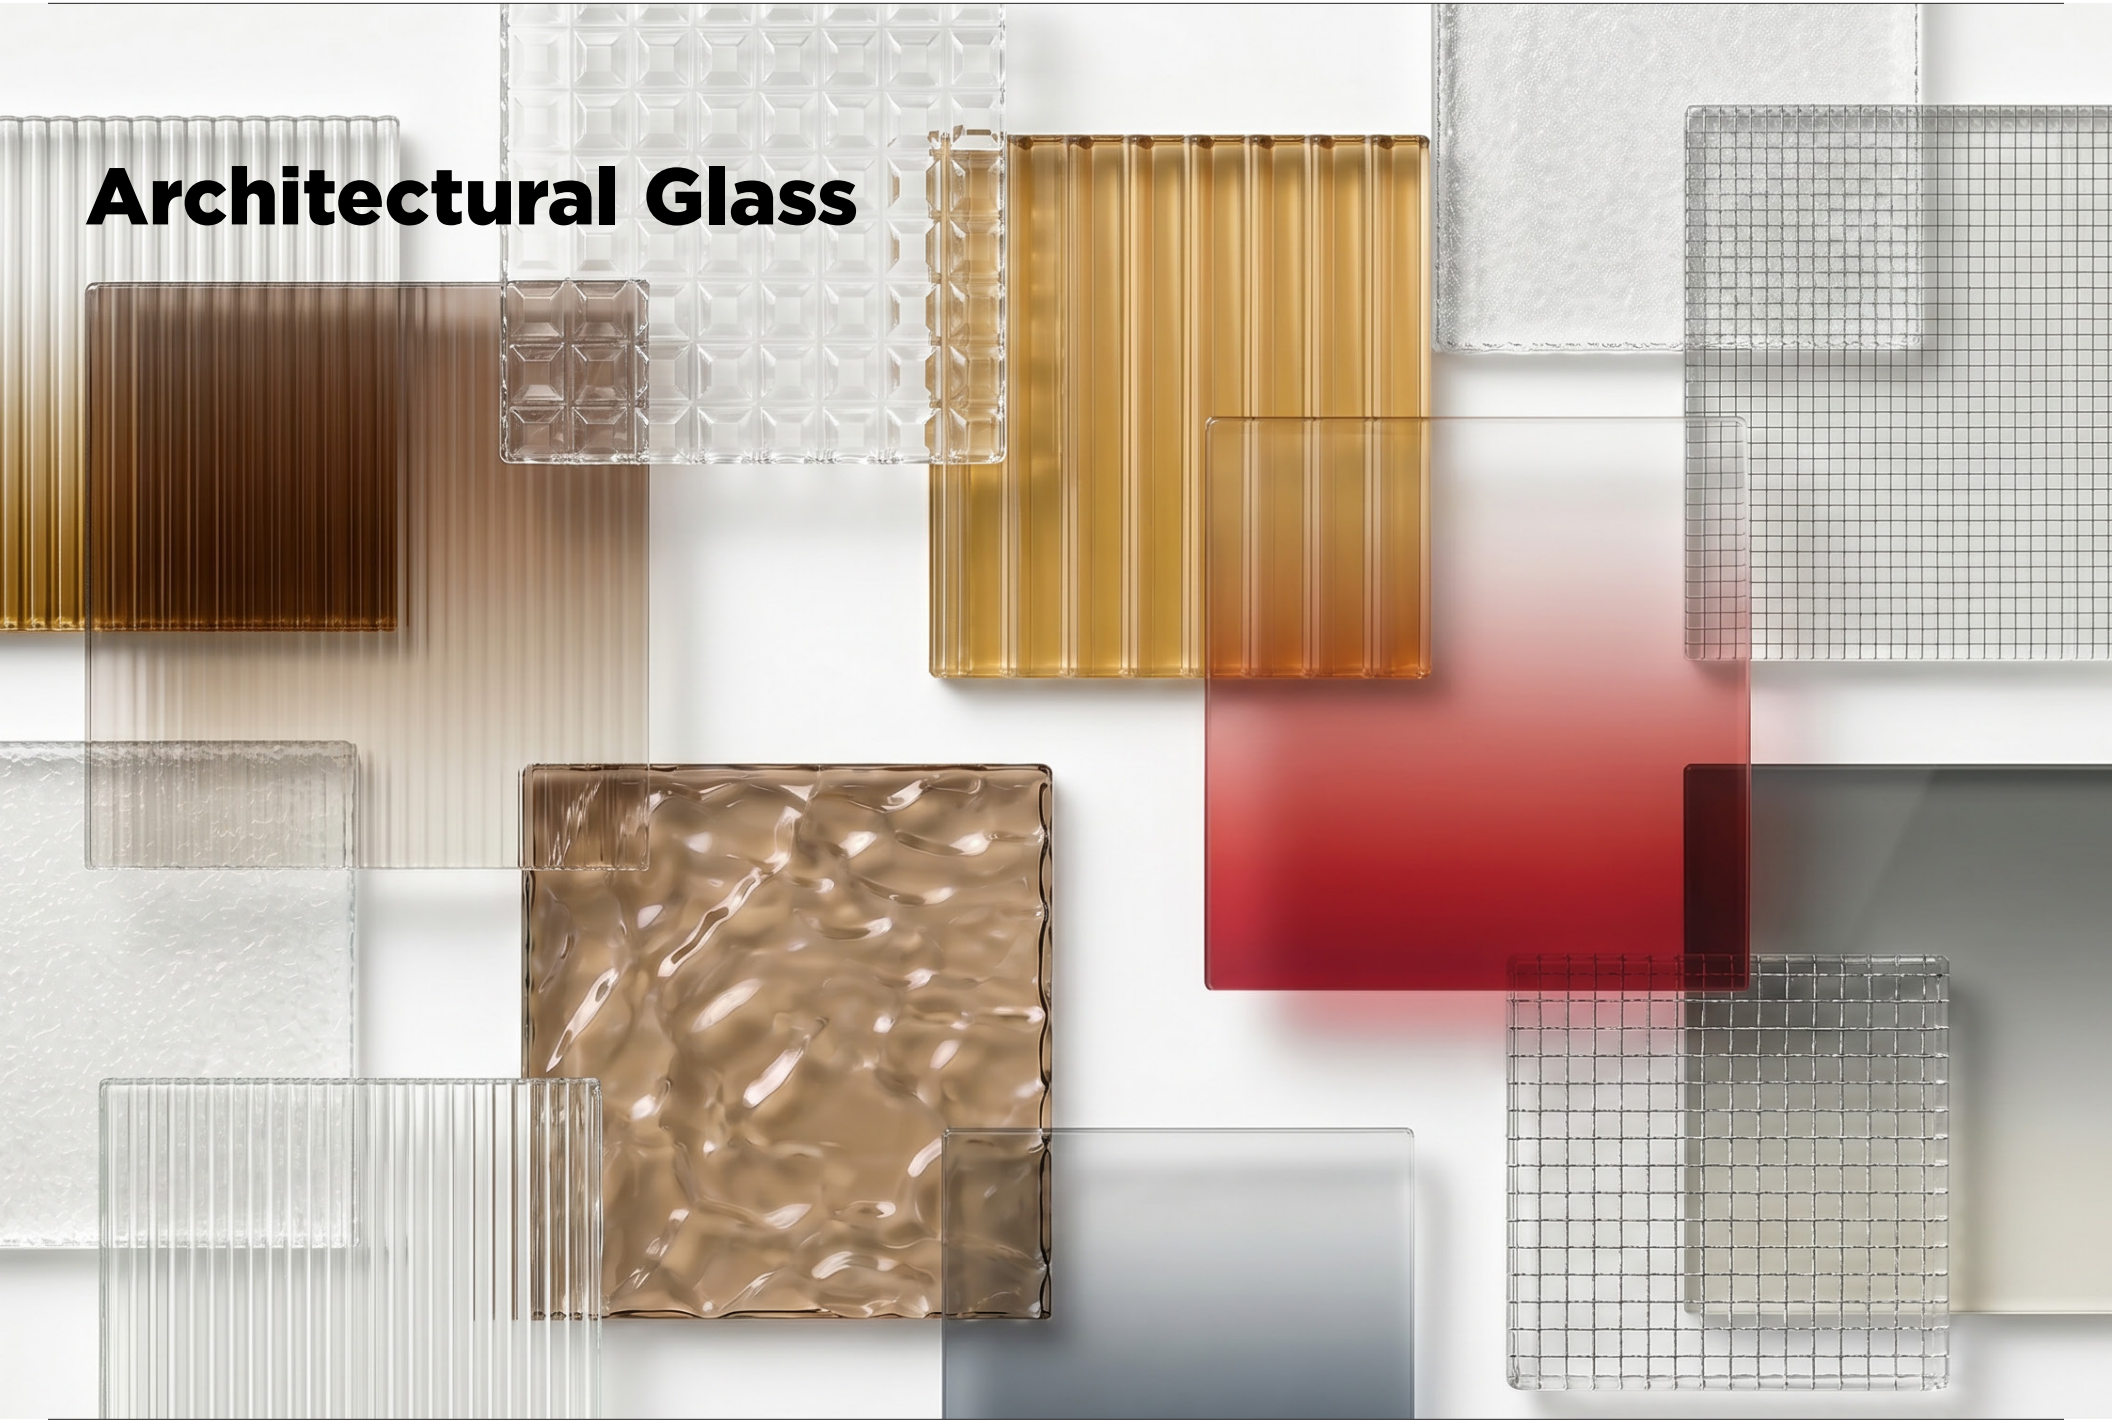

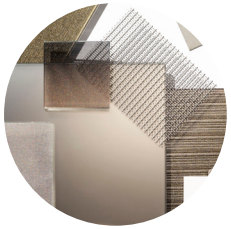

- Environmentally friendly process – No toxic chemicals or heavy metals like traditional electroplating.
- LEED-friendly – Contributes to sustainability goals depending on substrate and process.

- Low maintenance – Resists fingerprints, tarnishing, and discoloration far better than brass or anodized finishes.
- Color stability – UV-stable; won't fade or yellow over time.
- Easy to clean – Mild soap and water only; no polishing required.

Architectural Glass

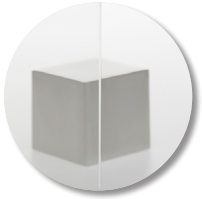

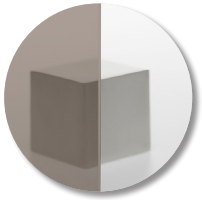

Architectural Glass

CARVART's capabilities in glass is nearly endless. Our offerings will accentuate your enclosure and bring unique sophistication to the space.

Wall Jamb

Ceiling Jamb

Adjustable Jambs

Our shower enclosures can be made to fit exact opening sizes with minimimal profiles. However for larger projects requiring tighter schedules and to avoid complications with installation and coordination with other trades CARVART offers standard adjustable jambs that can account for 3/8” out-of-plumb conditions.

Higher adjustment range can be achieved upon request.

Quality Hardware

Door Functions

CARVART'S line of refined enclosures feature three functions all with premium hardware

Pivot Hinges

Barrel Hinges

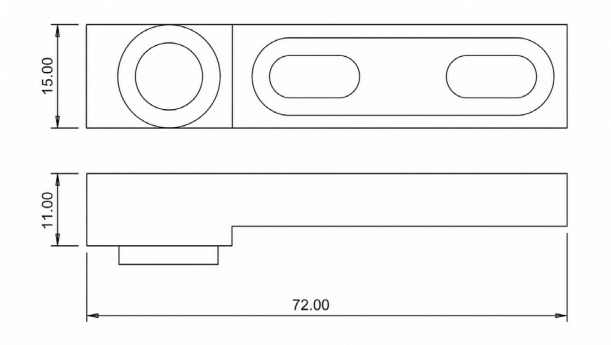

Soft-Close Sliders

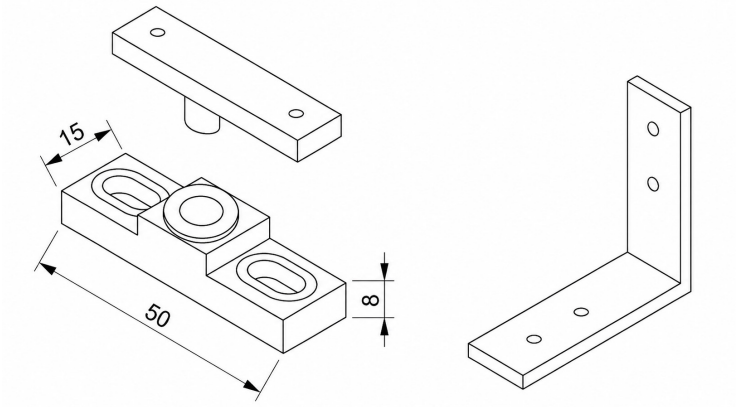

Integrated
Pivot Hinge

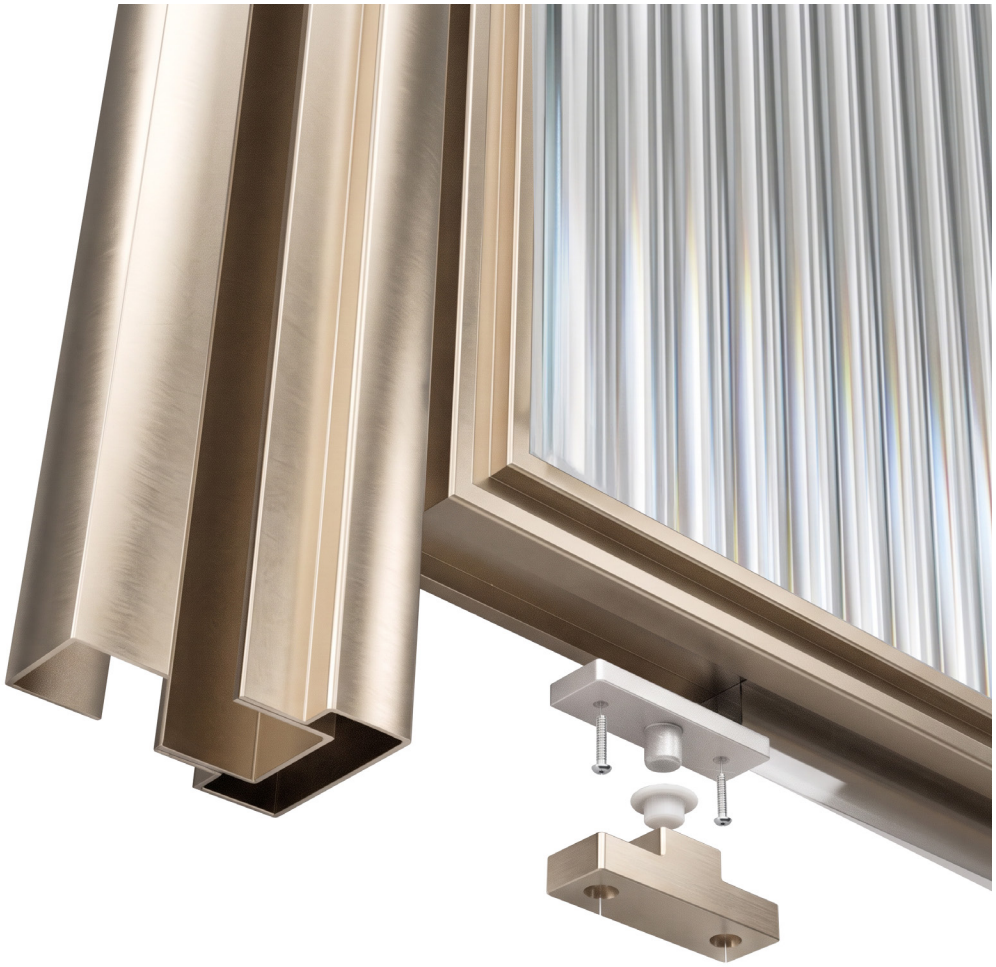

Pivot hinges can be incorporated into a bottom and top channel or be exposed as a design element or for uses as a WC door.
