CARVART®

residentialBATH

>Mirrors & Medicine Cabinets

CARVART blends bespoke craftsmanship with thoughtful standardization in its residential bath mirrors, delivering solutions that are as refined as they are functional. Built on robust stainless steel construction and available in rich PVD finishes like brushed bronze, champagne, and antique brass, our mirrors offer enduring performance and elevated aesthetics.

Whether you need a design that sits recessed, proud of finished surfaces, or even ceiling-mounted, CARVART's dynamic mounting options adapt to any spatial intent. Integrated LED lighting, a wide range of mirror finishes, and the option for wood accents or fully wood-clad frames allow for personalized ambiance and seamless integration with your bath interior—bridging custom design and curated standards with equal finesse.

Showroom Collection

CARVART offers custom, bespoke, and turnkey mirror and cabinet solutions that seamlessly blend function with refined design. From fully tailored dimensions, finishes, and integrated lighting to ready-to-install systems engineered for durability, each piece is crafted to harmonize with surrounding architecture. Designed for residential, hospitality, and commercial projects alike, CARVART's mirrors and cabinets provide elegant, functional solutions that elevate any interior.

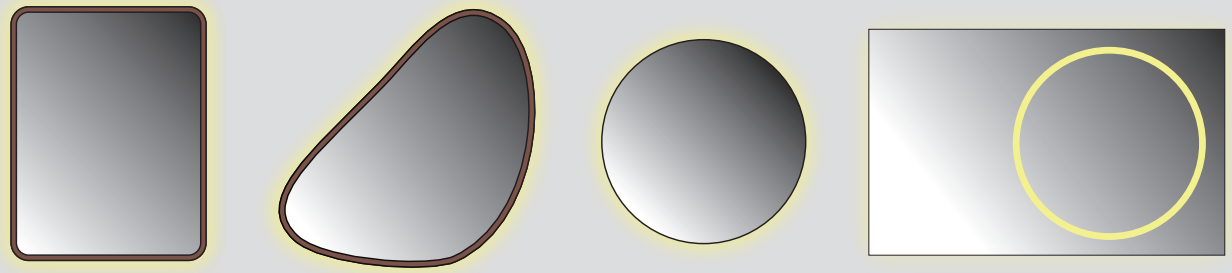

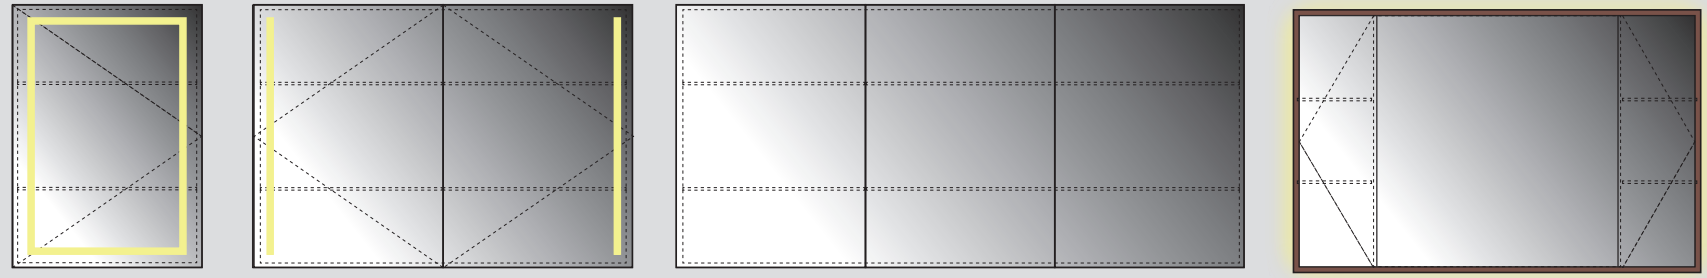

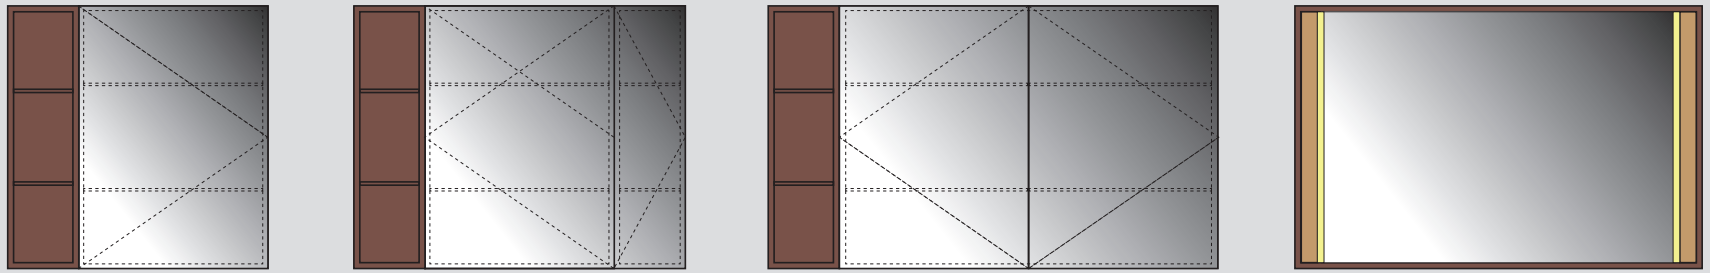

Custom Configurations

CARVART offers custom, bespoke, and turnkey mirrors and medicine cabinets with a wide range of features accessories and configurations.

Frame & Mirror Interactions

CARVART understands that details matter! We have mastered the art of edge reveals and seam lines and are able to custom match reveals that may exist in vanity drawers or wherever our client is looking to replicate these details.

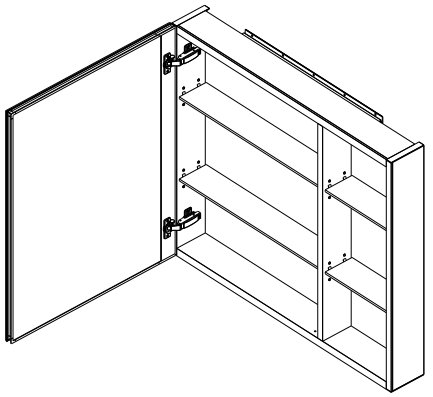

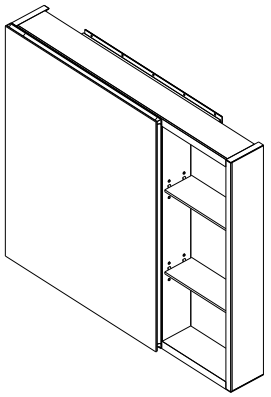

Niche Integration

Cabinet & Niche Integration

CARVART's medicine cabinet collection features a wide variety of PVD finishes and textures on our 301 stainless steel or aluminum frames. Inquire about custom configurations.

Lighting Integrations

LED Configurations

CARVART's LED mirror integrations can be programmed and synced to smart home lighting with a full range of options.

LED Temperatures

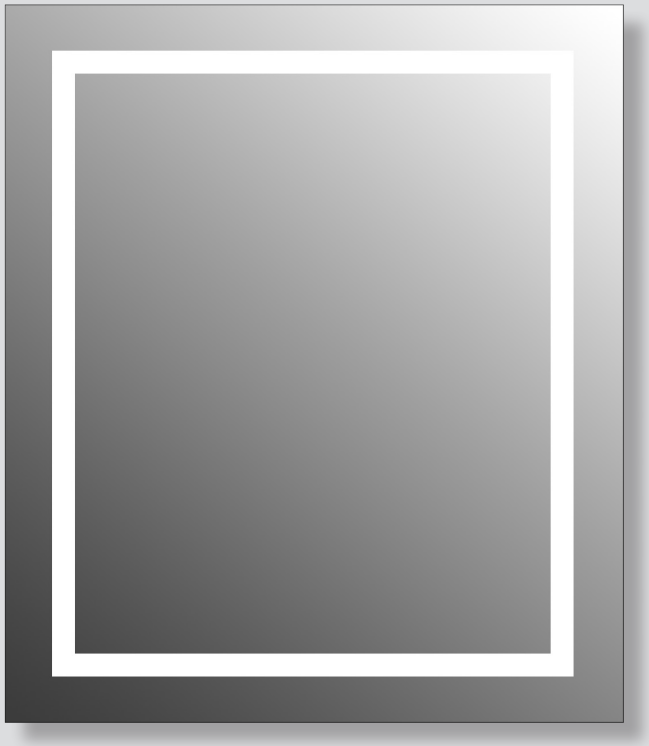

LED Ghost Mirrors

CARVART's ghost mirror offering is a technique developed to hide the integrated lighting while the light is turned off. By replacing this section with our two-way covert mirror we can achieve this seamless offering.

Completed Project

Location: Asbury Park, NJ

Scope: Comprehensive architectural glass and metal solutions including custom mirrors and shower enclosures. We were resposible for design engineering mirrors in varying sizes and matching finishes with our custom shower enclosures.

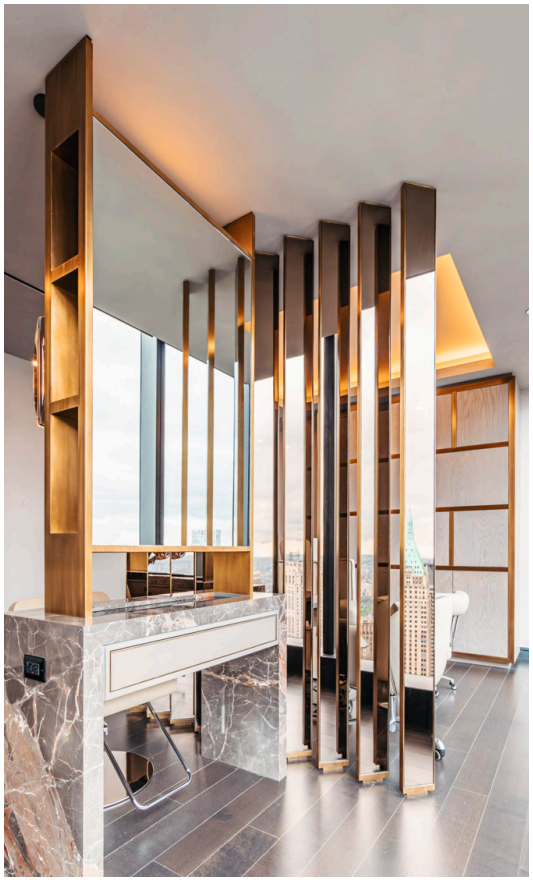

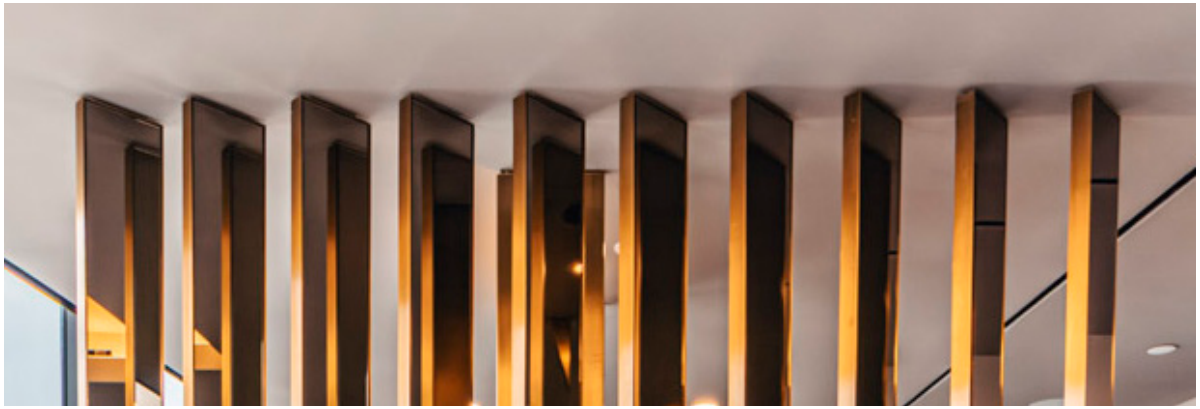

125 Greenwich St

Location: 125 Greenwich St. NYC
Client: Bizzi & Partners, Omnibuild
Architect: Rafael Viñoly

Scope: Comprehensive architectural glass and metal solutions including custom mirrors and shower enclosures. We were resposible for engineering, prefabrication, and custom material development.

Overview

CURATED MATERIALS

CARVART's team and resources bring an innovative spirit and celebrates the creative process. Our strength is solving design challenges with sophisticated detailing, engineering and a cohesive blend of materials across CARVART's minimalist interior and exterior architectural products and hardware systems.

CARVART empowers the creative process by curating an inspiring material offering of glass, stone, wood, cHPL, metals, meshes, textiles and more with patterns, textures, finishes and levels of transparency and reflectivity that allows creators to accurately envision their design.

GUIDELINES

- Materials appropriate for each system vary in size, thickness, type, weight and other associated properties.
- Explore each material for inspiration at carvart.com/materials and see full material palettes.
- Due to the various ways of creating with these materials, please consult a CARVART team member to ensure your material is best suited for a specific architectural product application.
- Materials can be integrated into CARVART's architectural system or available in sheets.
